

Jenni L. Evans
Director, Penn State Institute for Computational & Data Sciences (ICDS)
Professor, Department of Meteorology & Atmospheric Science
Faculty Associate, Earth & Environmental Systems Institute (EESI)
The Pennsylvania State University

Office (814) 865-3240 (MAS) E-mail Jenni.Evans@psu.edu
(814) 867-6075 (ICS) Web ics.psu.edu/director

CURRENT PROFESSIONAL APPOINTMENTS

Past President, American Meteorological Society, 2020 – present

Boston, MA

Director, Penn State Institute for Computational & Data Sciences (ICDS), 2019 – present

Office of the Senior Vice President for Research

The Pennsylvania State University

Tenured Full Professor, 2005 – present

Department of Meteorology & Atmospheric Science and Earth & Environmental
Systems Institute

The Pennsylvania State University

Professional Team Backup Hurricane Meteorologist, 2017 – present

Professional Team Backup Flood Meteorologist, 2015 – present

Florida Commission for Hurricane Loss Projection Methodology

Florida State Board of Administration

PRIOR PROFESSIONAL APPOINTMENTS

Centennial President (elected), American Meteorological Society, 2019 – 2020

Director, Penn State Institute for CyberScience (ICS), 2017 – 2019

Office of the Vice President for Research, The Pennsylvania State University

President Elect, American Meteorological Society, 2018

Professional Team Lead Meteorologist, 2004 – 2017

Professional Team Backup Meteorologist, 2003

Florida Commission for Hurricane Loss Projection Methodology

Florida State Board of Administration

Interim Director, Penn State Institute for CyberScience (ICS), 2016

Office of the Vice President for Research, The Pennsylvania State University

Acting Director, Penn State Institutes of Energy and the Environment, 2014 – 2015

Office of the Vice President for Research, The Pennsylvania State University

Interim Director, Earth and Environmental Systems Institute, 2013

College of Earth and Mineral Sciences, The Pennsylvania State University

Consulting Meteorologist, 2013

Division of Actuarial and Market Services, South Carolina Department of Insurance

Consulting Meteorologist, 2011

Maryland State Government Insurance Administration

Visiting Scientist, 2007 – 2008

Bureau of Meteorology Research Centre, Melbourne, Australia

Tenured Associate Professor, 1998 – 2005

Department of Meteorology and EESI, The Pennsylvania State University

Assistant Professor, 1992 – 1998

Department of Meteorology and EESI, The Pennsylvania State University

National Science Foundation CAREER Grant [1996]

Research Scientist, Commonwealth Scientific & Industrial Research Organisation, 1990–1992

CSIRO Division of Atmospheric Research

Melbourne, Australia

Visiting Scientist, Naval Postgraduate School, 1987 – 1989

Department of Meteorology, College of Engineering,

Monterey CA

Research Assistant [fluid dynamics laboratory], 1985 – 1987

Department of Mathematics, College of Science,

Monash University, Melbourne, Australia

Research Assistant [atmospheric boundary layer laboratory], 1984 – 1985

Department of Mechanical Engineering, College of Engineering,

Monash University, Australia

ACADEMIC AND PROFESSIONAL QUALIFICATIONS

Ph. D., Applied Mathematics, Monash University [1990]

B. Sc. (Honors) Applied Mathematics, Monash University [1984]

PROFESSIONAL SOCIETIES

- American Meteorological Society (AMS), Fellow
- American Association for the Advancement of Science (AAAS), Fellow
- Coalition for Academic Scientific Computation (CASC)
- Association for Computing Machinery (ACM)
- Australian Meteorological and Oceanographic Society (AMOS)
- American Geophysical Union (AGU)
- Chi Epsilon Pi [XEPI] Meteorological Honor Society

HONORS AND AWARDS

- Centennial President (elected), American Meteorological Society (AMS) [2019]
- Fellow, American Association for the Advancement of Science (AAAS) [2019]
- Editors Award, Eos, American Geophysical Union (AGU) [2013]
- Fellow, American Meteorological Society [2010]
- Councilor (elected), American Meteorological Society [2005 – 2008]
- NSF CAREER Grant [1996]

RESEARCH INTERESTS

My research is organized around the themes of tropical cyclones, tropical convection and climate change. I am one of a small group of scientists who recognized and developed the research area of Extratropical Transition (ET) of tropical cyclones (TCs) – most of these scientists are co-authors on the Jones et al. (2003) paper listed below. The current generation of ET researchers contributed to a recent paper updating the state of understanding of ET (Keller et al. 2018).

I have also been instrumental in bringing together a core group of scientists – drawn from nine countries and spanning climate, social, mathematical and biological sciences – to explore climate change impacts for key societal questions.

Thematic research areas: tropical cyclones [TC]/hurricanes, organized tropical convection (mesoscale convective systems); TC response to climate change; downscaling of climate change impacts relating to security of water, food and energy; physically-based synthesis of ensemble forecasts; physical evolution of tropical cyclones through extratropical transition [ET]; subtropical cyclones; tropical cyclogenesis; African Easterly Waves; statistical assessment of hurricane risk.

Tools employed: dynamical numerical simulations; application of statistical techniques new to meteorology (point and path clustering, dimension reduction); ensemble prediction and analysis relating to TCs and African climate; analysis and downscaling of climate model simulations; satellite data analysis; field experiments.

Impact on TC forecasting: My research group developed the Cyclone Phase Space [CPS] framework to represent the temporal evolution of the 3-dimensional TC structure. Since its publication in 2003, the CPS has become a standard tool in operational TC forecasting for the U.S. and Canadian National Hurricane Centers. It is also used by forecasters at the U.S. Air Force Weather Squadron, the Joint (U.S. Navy/Air Force) Typhoon Warning Center, the Australian Bureau of Meteorology and Japanese Meteorological Agency.

ADMINISTRATION OF ADVANCED COMPUTATIONAL SYSTEMS

My role as ICDS Director includes overseeing advancement of state-of-the-science research compute capabilities. From 2016-2018 we designed and implemented a new, advanced High Performance Computing (HPC) system with capabilities placing it in the top 15 academic HPC facilities. The end-to-end treatment of data, and development of collaborative HPC capabilities across multiple institutions are challenges we are currently addressing.

In 2019 we implemented an internal cloud capability and in 2020 we are expanding this to include the full range of external cloud options (commercial providers, academic institutions, government laboratories, etc.), creating a hybrid cloud capability.

PUBLISHED WORKS

Refereed Journal Articles

Student co-authors: graduate students or postdocs for whom I am/was major advisor for the published research; *all other students* (graduate committees or undergraduate advisees).

PRESENTATIONS

International Invited Presentations

- 2019 European Meteorological Society Annual Meeting, Lyngby, Denmark.
- 2015 PANDOWAE Final Symposium: Progress and Future Directions of Research on Predictability and Dynamics of Midlatitude Weather Systems, Karlsruhe, Germany.
- 2014 8th WMO (World Meteorological Organisation) International Workshop on Tropical Cyclones (IWTC-VII), Jeju Island, Republic of Korea.
- 2011 XXV IUGG General Assembly, Joint symposium: (J-M10) Monsoons, Tropical Cyclones and Tropical Dynamics. Melbourne, Australia.
- 2010 7th WMO (World Meteorological Organisation) International Workshop on Tropical Cyclones (IWTC-VII), La Réunion, France.
- 2008 National workshop on Subtropical Cyclones and Extratropical Transitions, Agencia Estatal de Meteorología, Madrid, Spain (Multiple presentations).
- 2006 6th WMO International Workshop on Tropical Cyclones (IWTC-VI), San Jose, Costa Rica.
- 2006 1st International THORPEX Science Symposium, Montreal, Canada.
- 2005 3rd WMO International Workshop on Extratropical Transition (IWET-III), Perth, Australia (Multiple presentations).
- 2003 II Simposium Internacional Sobre Ciclonología Tropical "Padre Benito Viñes S. J. In Memoriam" (co-sponsored by the WMO, Spanish and Cuban National Weather Services), Havana, Cuba.
- 2003 2nd International Workshop on Extratropical Transition (IWET-II), Halifax, Nova Scotia, Canada.
- 2003 Hadley Centre for Climate Change Research, United Kingdom Meteorological Office, Bracknell, UK.
- 2002 5th WMO International Workshop on Tropical Cyclones (IWTC-V), Cairns, Australia.
- 1999 WMO Workshop on the Extratropical Transition of Tropical Cyclones, Kaufbeuren, Germany.
- 1998 Risk Prediction Initiative (RPI) Workshop, Bermuda Biological Station, St Georges, Bermuda.
- 1996 Department of Applied Mathematics and Theoretical Physics, Cambridge University, Cambridge, UK.
- 1995 Risk Prediction Initiative (RPI) Workshop, Bermuda Biological Station, St Georges, Bermuda.
- 1993 3rd WMO International Workshop on Tropical Cyclones (IWTC-III), Huatulco, Mexico.
- 1988 3rd ONR Tropical Cyclone Motion Workshop, Rainbow Beach, Queensland, Australia.

Invited Presentations

1. September 2019: AMS 100 Years, 6th Joint Conference of the American Meteorological Society and EUMETSAT on Satellites, Boston MA.
2. April 2019: New Minds for New Science Symposium, American Meteorological Society, Washington DC.
3. March 2019: PSU Law Review Symposium, The Pennsylvania State University and K. & L. Gates, Pittsburgh, PA.
4. January 2019: Special Symposium on Catalyzing Innovation in Weather Science Internationally, 99th American Meteorological Society Annual Meeting, Phoenix, AZ.
5. December 2018: Second ADAPT Symposium, Keynote Speaker, The Pennsylvania State University, University Park, PA
6. September 2018: Tribute to Warren Washington, The Pennsylvania State University, University Park, PA, <https://www.youtube.com/watch?v=Pe-x9UeoyIk&index=14&list=PLaOAwxJsi4ujKTtojoOtCSD68fuUG4Ca>
7. December 2017: American Geophysical Union Fall Meeting, New Orleans, LA.
8. February 2017: Department of Geography, The Pennsylvania State University, University Park, PA.
9. October 2016: Institutes Days, The Pennsylvania State University, University Park, PA.
10. June 2013: U.S. Hurricane CLIVAR (Climate Variability and Predictability Research Program) Workshop, GFDL, Princeton, NJ.
11. April 2013: Department of Civil and Environmental Engineering, Duke University, Durham, NC.
12. February 2013: CarbonEARTH Conference, The Pennsylvania State University, University Park, PA.
13. October 2012: Research Unplugged Lecture Series, The Pennsylvania State University, University Park, PA.
14. April 2011: Department of Earth Science, California University of Pennsylvania, California, PA.
15. March 2011: Department of Meteorology, The Pennsylvania State University, University Park, PA.
16. April 2010: University at Albany, State University of New York, Albany, NY.
17. February 2010: University at Stony Brook, State University of New York, Stony Brook, NY.
18. January 2009: Lamont Dougherty Earth Observatory, Columbia University, Palisades, NY.
19. December 2008: Department of Geography, The Pennsylvania State University, University Park, PA.
20. October 2008: Climate Change Lecture Series, Bruce Museum, Greenwich, CT.
21. October 2008: PSUBAMS, Department of Meteorology, The Pennsylvania State University
22. October 2008: NSF Cutting Edge Workshop, Northfield, MN.

23. May 2007: NSF Early Career Workshop for Junior Faculty, College of William and Mary, Williamsburg, VA.
24. January 2007: [AMS Forum on Climate Change Manifested by Changes in Weather](#), San Antonio, TX.
25. January 2007: Earth System Science Center, The Pennsylvania State University
26. August 2006: National Hurricane Center, National Weather Service, Miami, FL.
27. May 2006: NSF Early Career Workshop for Junior Faculty, College of William and Mary, Williamsburg, VA.
28. September 2005: Department of Meteorology, Florida State University, Tallahassee, FL.
29. October 2004: Department of Meteorology, The Pennsylvania State University
30. April 2003: Lock Haven University, Lock Haven, PA.
31. February 2003: New Perspectives on Catastrophe Risk, Risk Management Solutions National Workshop, 10-13 February 2003: Las Palmas CA.
32. February 1999: US National Interdepartmental Hurricanes Conference, Biloxi, MI.
33. August 1998: Climate Extremes: Changes, Impacts and Projections, Aspen Global Change Institute, Aspen CO.
34. May 1997: State University of New York at Albany, Albany NY.
35. April 1996: Department of Earth, Atmosphere and Planetary Sciences, Harvard University, Cambridge, MA.
36. April 1996: Women in Science and Engineering (WISE) Voices Conference, The Pennsylvania State University, University Park, PA.
37. August 1995: Center for Meteorology and Physical Oceanography, The Massachusetts Institute of Technology, Cambridge, MA.
38. July 1995: Department of Meteorology, State University of New York, Albany, NY.
39. August 1994: Anticipating Global Change Surprises Workshop, Aspen Global Change Institute, Aspen CO.
40. August 1992: The Coupled Climate System and Global Change Workshop, Aspen Global Change Institute, Aspen, CO.
41. July 1992: National Center for Atmospheric Research (NCAR), Boulder, CO.
42. April 1992: Department of Meteorology, The Pennsylvania State University, University Park, PA.
43. November 1991: Department of Atmospheric Physics, University of Arizona, Tucson, AZ.
44. June 1991: Convener and lead presenter of a set of Tropical Climate Change Workshops for the (1) Conservation Commission of the Northern Territory, and (2) the CSIRO Centre for Wildlife and Ecology, Alice Springs, Northern Territory, Australia.
45. May 1991: Department of Meteorology, Texas A&M, College Station, TX.
46. May 1991: Department of Geological and Atmospheric Sciences, Iowa State University, Ames, IA.

47. September 1988: Department of Meteorology, Florida State University, Tallahassee, FL.
48. February 1988: Tropical Cyclone Motion Workshop, Naval Postgraduate School, Monterey, CA.

Conference Presentations

I have presented or co-authored over 110 conference presentations/papers, with the vast majority of my co-authors being my students or postdocs. An incomplete list of these presentations is appended. To satisfy eligibility requirements for the American Meteorological Society's Max Eaton Student Prize, over 25 additional papers on my group's research have also been presented by my students as sole authors.

FIELD PROGRAM PARTICIPATION

Operational Science Team, Tropical Pacific Asian Regional Campaign (T-PARC), North Pacific Ocean, August-September 2008

My participation in this experiment revolved around determining scientific priorities and strategies for deploying observing platforms in a multi-national field experiment.

Science Team, NOAA Research Flights (NOAA Gulfstream-IV jet and WP-3D Orion) into Hurricane Ivan, 14 – 15 September 2004

These two NOAA research flights into Hurricane Ivan (2004) were on the two days prior to its landfall in Alabama. September 14: flew on the NOAA Gulfstream-IV jet, observing the environment around the storm. September 15: flew on the NOAA WP-3D Orion prop plane; the science mission for this flight required eight crossings of the hurricane's eye while it was a Cat 4 system. I was involved in QC of GPS dropsonde data.

Rawinsonde coordinator, US Tropical Cyclone Motion 1990 (TCM-90) Field Program, Guam, August 1990

TCM-90 was one of five cooperative and coincident national field experiments designed to study the motion of tropical cyclones in the western North Pacific region in August and September 1990.

Meteorological observer, NOAA Research flight (WP-3D Orion) into Hurricane Florence, September 1988

This flight was organized through the Hurricane Research Division of the Atmospheric and Oceanic Marine Laboratory of the National Oceanic and Atmospheric Administration of the U.S., Miami, FL. My participation included realtime quality control of dropwindsondes.

Meteorological observer in Australia

Southerly Buster field experiment II, Narooma, NSW, 1985

Meteorological observer, Southerly Buster field experiment I, Nowra, NSW, 1982

Meteorological observer, Morning Glory field experiment, Burketown, QLD, 1982

Meteorological observer, Australian Cold Fronts Research Program Phase II, Branhholme, VIC, 1981

POSTDOCTORAL FELLOW AND GRADUATE STUDENT MAJOR ADVISOR

Current Research Group

2017 – present Alex Kowaleski (Postdoctoral fellow): Novel methods for exploring the limits of tropical cyclone forecasting.

2016 – present Kelly Núñez Ocasio (Doctoral candidate): Role of topography in the development of mesoscale convective systems in tropical West Africa.

2016 – present Andrew Polasky (Doctoral candidate): INFEWS: Climate change downscaling for food, energy and water resources over the US Midwest.

Major Advisor or co-Advisor (Degree/Postdoctoral Fellowship Completed)

2016 – 2018 Holly Hamilton, Postdoctoral fellow: Climate change downscaling for food, energy and water resources over the US Midwest. Previously: Climate change impacts on organized convective weather systems in tropical Africa.

2017 Alex Kowaleski, Doctorate: Novel methods for exploring the limits of tropical cyclone forecasting.

2016 Holly Hamilton, Doctorate: Relationships between rainfall characteristics and environmental predictors in the West African region.

2013 Alex Kowaleski, Master of Science: Sensitivity of tropical cyclone potential intensity to observed near-surface conditions. Alex continued on to doctorate with me, graduating in 2017.

2012 Mike Lowe, Master of Science (co-adviser: George Young): Reducing hurricane evacuation costs in Florida through improved track forecasting. Mike is now an AOPC trainer.

2011 Holly Hamilton, Master of Science: Observations of tropical cyclone boundary layer winds in the core of Hurricane Ike. Holly continued her doctoral studies with me, co-advised with Prof. Jose Fuentes.

2011 Prabhani Kuruppumullage Don, Master of Science in Statistics (co-advised with Francesca Chiaromonte): Evolution characteristics of ensemble forecasts through clustering. Prabhani graduated with a Doctorate in Statistics in Summer 2014 and is now an Assistant Professor in the Department of Statistics at Penn State.

Major Advisor or co-Advisor (continued)

- 2011 Jeff Waters**, Master of Science (co-advisor: Chris Forest): Towards improving the detection of North Atlantic tropical cyclogenesis (TCG). Jeff works in the risk modeling industry (Risk Management Solutions).
- 2010 Michael Hernandez**, Master of Science: The effects of latent heating on the extratropical transition of Typhoon Sinlaku. Upon graduating, Mike took a position at the University of Oklahoma.
- 2009 Aviva Braun**, Master of Science: A comparison between South Atlantic and Tasman Sea subtropical storms. Upon graduating, Aviva joined the Peace Corps and was stationed in Senegal, West Africa. She is now with the National Weather Service office in Boise, ID.
- 2009 Thomas Sabbatelli**, Master of Science (co-advisor: Mike Mann): The influence of climate state variables on Atlantic tropical cyclone activity. Tom works in the risk modeling industry (Risk Management Solutions).
- 2007 Daniel Veren**, Master of Science: Statistical analysis of ensemble forecasts of the structural evolution of Typhoon Tokage (2004) through extratropical transition. Daniel is an Engineer at Ball Aerospace (formerly US Air Force).
- 2006 Mark Guishard**, Doctorate: Atlantic subtropical storms: Climatology and characteristics. Mark was Director of the Bermuda Weather Service (2006–2012), now at the Risk Prediction Initiative (RPI).
- 2006 Adam Moyer**, Master of Science: Analysis of observational datasets of tropical cyclone wind radii. Adam is now Senior Vice President at Planalytics, Inc.
- 2005 Jessica Higgs**, Master of Science: Regression models for warm season cyclone wind radii. Jessica (Arnoldy) is a forecaster and analyst with The Weather Channel.
- 2005 Aaron Pratt**, Master of Science: Tropical cyclogenesis forecasting skill of the Global Forecasting System (GFS) during the 2002 and 2003 Atlantic hurricane seasons. Aaron earned a doctorate from Howard University and went on to a NASA postdoctoral fellowship.
- 2004 Justin Arnott**, Master of Science: Cluster analysis approach to classification and simulation of cyclone structure. Justin is a Science and Operations Officer for the US National Weather Service (Gaylord MI).
- 2003 David Robinson**, Master of Science: The effect of model forecast track errors on QPF in Atlantic tropical cyclones. David is a private industry forecaster.
- 2002 Barbara Prater**, Master of Science: The extratropical transition of Hurricane Irene (1999): Case study and satellite-derived data assimilation. Barb earned her PhD in 2014 from Univ. Nebraska and is a Science and Operations Officer at NWS Omaha/Valley, NE.
- 2001 Robert E. Hart**, Doctorate: Extratropical transition of North Atlantic tropical cyclones. Bob is a Professor in the Department of Earth, Ocean and Atmospheric Science at Florida State University.

Major Advisor or co-Advisor (continued)

2001 Steven Chan, Master of Science: Composite structure and variability of the eastern Hemisphere ITCZ during boreal summer in ECMWF Re-analysis, CCM3.6 and SI2000 General Circulation Models. Steven is a research fellow at Newcastle University, UK.

2000 Giorgos Tsakrklides, Master of Science: Diurnal and seasonal variability of organized tropical convection. George is a high school science teacher at Moses Brown School, Providence RI.

1999 Sytske Kimball [Drury], Doctorate: Idealized simulations of hurricane-trough interactions. Sytske is a Professor at the University of South Alabama in Mobile.

1997 Francine A. Jaskiewicz, Master of Science: The Hadley circulation. After a stint at the Weather Channel, Francine returned to Philadelphia to the family antique jewelry business.

1997 Daniel P. Guertin, Master of Science: PV analyses of tropical cyclone intensity change. After some time on Wall Street, Dan is a Senior Meteorologist at EDF Trading, London, UK.

1997 Joseph R. Davis, Master of Science: A history and significance of aircraft reconnaissance. Upon graduation, Joe took a job with Accu Weather.

1995 Jon Flatley, Master of Science: Analysis of ARM/CART site data. Jon is an adjunct faculty in the Department of Earth Sciences at Millersville University and climate change blogger.

1994 Robert E. Shemo, Master of Science: Automated satellite convection detection and classification system. Information Systems Compliance Manager, People's Mutual Holdings.

Visiting Doctoral Students

2016 and 2017 Juan Jesus González-Alemán, *Environmental Sciences Institute, University of Castilla-La Mancha (UCLM), Toledo, Spain*

Juanje is presently a doctoral student. During his Masters research, we began to collaborate since his research was related to my subtropical cyclone research. In 2019, this collaboration continues, now looking at ensemble forecasts of initially subtropical Hurricane Alex (2016).

2010 and 2014 Julia Keller, *Institute of Meteorology and Climate Research, Karlsruhe Institut für Technologie (KIT), Karlsruhe, Germany*

Julia graduated her PhD from the Department of Physics at KIT. After a brief stint in the research division of the DWD (German Weather Service), she took a position at the World Meteorological Organisation in Geneva. She has since returned to DWD Research.

Incomplete List of Other Graduate Committee Service

I have served on PhD and Masters committees in 7 Penn State Departments [Meteorology, Statistics; Mathematics, Geosciences, Agricultural, Environmental & Regional Economics, Geography and Electrical Engineering].

External committee service includes the Institute for Meteorology and Climate Research, University of Karlsruhe, Germany; Department of Civil and Environmental Engineering, Duke University; and Department of Atmospheric Sciences at the University at Albany, SUNY. External examiner for Department of Meteorology, University of Melbourne, Australia; and the Department of Mathematics, Monash University, Australia.

A subset of the graduate committees on which I have served (but not chaired):

1. Dapeng Feng (PhD Department of Civil & Environmental Engineering, 2019–present; Chaopeng Shen adviser)
2. Stephanie Blanda (PhD Department of Mathematics, 2019; Diane Henderson adviser)
3. Esha Zaveri (PhD Agricultural, Environmental and Regional Economics 2016; Karen Fisher-Vanden adviser)
4. Phuc Lam Hoang (PhD Mathematics, Monash University, Melbourne, Australia 2016; Michael Reeder adviser)
5. Daniel Brouillette (Masters Meteorology 2015; Mike Mann adviser)
6. Dandan Tao (PhD Meteorology 2015; Fuqing Zhang adviser)
7. Jon Poterjoy (PhD Meteorology 2014; Fuqing Zhang adviser)
8. Julien Brun (PhD, Department of Civil and Environmental Engineering, Duke University 2013; Ana Barros adviser)
9. Meri Davlasheridze (PhD, Agricultural, Environmental and Regional Economics 2013; Karen Fisher-Vanden adviser)
10. Erin Munsell (Masters Meteorology 2013; Fuqing Zhang adviser)
11. Julia Keller (PhD, Department of Physics, University of Karlsruhe, Germany 2012; Sarah Jones adviser)
12. Luna Rodriguez (PhD Meteorology 2012; George Young and Sue Ellen Haupt co-advisers)
13. Prabhani Kuruppumullage Don (Masters Statistics 2011; Francesca Chiaromonte adviser)
14. Michael Kozar (Masters Meteorology 2011; Mike Mann adviser)
15. Fangxing Fan (PhD Meteorology 2011; Mike Mann adviser)
16. Andreas Artemiou (PhD Statistics 2010; Bing Li adviser)
17. Savin S. Chand (PhD Meteorology, University of Melbourne, Australia 2010; Kevin Walsh adviser)
18. Corene Matayas (PhD Geography 2005; Andrew Carleton adviser)
19. Jason Cole (PhD Meteorology 2004; Eugene Clothiaux adviser)
20. Maria Teresa Cavazos (PhD Geography 2000; Rob Crane adviser)
21. Jan Dutton (PhD Geosciences 1999; Eric Barron adviser)
22. Christopher Poulsen (PhD Geosciences 1999; Mike Arthur adviser)
23. Deborah Hanley (PhD Atmos. Sci., SUNY Albany 1999; Dan Keyser, John Molinari advisers)
24. Tim Marchok (Masters Meteorology 1994; Bill Frank adviser)
25. Lisa Briegel (Masters Meteorology 1993; Bill Frank adviser)

CURRENT PROFESSIONAL SERVICE

Current External Professional Service

2020 – Past President, American Meteorological Society

The American Meteorological Society (AMS) is the premier national professional organization for atmospheric and related sciences. AMS membership includes broad participation from academic, government, private industry, non-government organizations and elsewhere, with members being forecasters, administrators, consultants, broadcasters, weather enthusiasts and researchers.

2020 – Executive Committee, American Meteorological Society

2020 – Council, American Meteorological Society

2020 – Chair, Awards Oversight Committee, American Meteorological Society

2020 – Annual Meeting Oversight Committee, American Meteorological Society

2020 – Finance Committee, American Meteorological Society

2020 – Investment Committee, American Meteorological Society

2020 – Fellows Committee, American Meteorological Society

2020 – Graduate Fellowship Awards Committee, American Meteorological Society

2019 – National Academies Panel to review the Army Research Laboratory

The focus of this panel to review Information Sciences at the Army Research Laboratory.

2018 – Earth Sciences Council, Universities Space Research Association

USRA brings together universities and other research organizations together with the governments of the United States and other nations toward the development and application of space-related science, technology and engineering. The Earth Sciences Council provides leadership in the realm of earth and environmental sciences.

2017 – Hurricane Meteorologist, FCHLPM Professional Team

Florida Commission on Hurricane Loss Projection Methodology

Florida State Board of Administration

2015 – Flood Meteorologist, FCHLPM Professional Team

Florida Commission on Hurricane Loss Projection Methodology

The Florida Commission for Hurricane Loss Projection Methodology was created by the Florida Legislature in 1995 to evaluate proprietary modeling methodologies used to project insured hurricane losses in Florida. At the same time, the Legislature created an interdisciplinary Professional Team (“Pro Team”) to evaluate these proprietary models and to report on their findings to the Commission. I serve as the lead meteorologist on the Pro Team. The other core fields represented are wind engineering, statistics, actuarial, and computer science.

The Pro Team conducts scientific and technical audits of the proprietary software used in submissions to insurance regulators for setting hurricane insurance premiums. My expertise in this process has also led to my advising state government offices in Massachusetts, Maryland, and South Carolina.

2012 – Subject Matter Expert, United Nations ESCAP/WMO Typhoon Committee

UN ESCAP is the Economic and Social Commission for Asia and the Pacific of the United Nations and is organized under the auspices of the World Meteorological Organization. Subject Matter Experts contribute to professional development activities focused on improving typhoon forecasting in the fourteen member nations of the western North Pacific.

Current Service in Academic Planning and Governance

2019 – Director, Penn State’s Institute for Computational & Data Sciences (ICDS)

2017 – Partnership Liaison, Penn State–Monash University (Australia) Global Engagement Program

2016 – Executive Committee, Driving our Digital Future

2015 – Executive Committee, Penn State Research Computing Cyber Infrastructure (RCCI) Governance

2015 – RCCI Working Group on High Performance Computing

2015 – Penn State Working Group on the NSF Northeast Big Data Hub

2010 – Graduate Academic Program Committee, Department of Meteorology & Atmospheric Science

Ongoing Broad range of activities promoting science communications.

Ongoing Broad range of activities promoting recruitment and retention of women and minorities in the sciences and engineering.

Ongoing Reviewer for numerous promotion and tenure cases from US, Europe, Britain, Australia.

Ongoing Reviewer for National Science Boards from USA (incl. Puerto Rico), Britain, Australia, Germany, Canada, Hong Kong, Israel, China, Spain and Japan.

Ongoing Reviewer: J. Atmospheric Sciences; Quarterly Journal of the Royal Meteorological Society, UK; Monthly Weather Review; Australian Meteorological & Oceanographic Journal; J. Climate; Geophysical Research Letters; International J. Climatology; J. Meteorology Society of Japan; Weather and Forecasting; Climatic Change; Bulletin of the American Meteorological Society; Global and Planetary Change.

PRIOR PROFESSIONAL SERVICE

Prior External Professional Service

2020 Session co-chair, Women in the Tropics Part II. Joint Session: 33rd Conference on Climate Variability and Change/Tropical Meteorology and Tropical Cyclones Symposium. *100th AMS Annual Meeting, 12-16 January 2020, Boston MA.*

2019 – 2020 Centennial President, American Meteorological Society

The American Meteorological Society (AMS) is the premier national professional organization for atmospheric and related sciences. AMS membership includes broad participation from academic, government, private industry, non-government organizations and elsewhere, with members being forecasters, administrators, consultants, broadcasters, weather enthusiasts and researchers.

As AMS President, I serve on all committees of the Society, Chair of the Executive Committee of the AMS Council, and Chair of the AMS Council; Convener of the 100th Anniversary Program Committee; Vice-Chair of the Centennial, Finance, Investment and Fellows Committees.

2019 Chair, Executive Committee, American Meteorological Society

2019 Chair, Council, American Meteorological Society

2019 Convener and Chair, Centennial Annual Meeting, American Meteorological Society

2019 Awards Oversight Committee, American Meteorological Society

2019 Annual Meeting Oversight Committee, American Meteorological Society

2019 Vice-chair, Finance Committee, American Meteorological Society

2019 Vice-chair, Investment Committee, American Meteorological Society

2019 Vice-chair, Fellows Committee, American Meteorological Society

2019 Vice-chair, Centennial Committee, American Meteorological Society

2019 Ex-officio on all other committees, American Meteorological Society

2018 President-Elect, American Meteorological Society

2017 US Delegation, World Meteorological Organisation Science Summit: Seamless research for weather, climate, water & environment. 16-23 October, Geneva, Switzerland.

2017 Union session co-chair, IN31F: Examining Societal Impacts of the 2017 Atlantic Hurricane Season: Informatics and Engineering. American Geophysical Union Fall Meeting, New Orleans LA.

2016 – 2019 EarthCube Advisory Group (<http://earthcube.org/>), National Science Foundation

Prior External Professional Service (continued)

- 2016 NSF Panel to Review Management of the National Centers for Atmospheric Research (NCAR) by the University Corporation for Atmospheric Research (UCAR)
- 2016 Reviewer, US National Academy of Sciences Gulf Research Program
- 2016 NSF Proposal Review Panel (Atmospheric Science)
- 2016 Session chair, 2016 National Council for Science and the Environment (NCSE) 16th National Conference: The Food-Energy-Water Nexus, Washington, DC
- 2015 – 2017 Penn State representative, Board on Oceans and Atmosphere, Association of Public and Land-grant Universities (APLU)
- 2014 External reviewer, Department of Atmospheric and Environmental Science, University at Albany, State University of New York
- 2013 – 2016 Awards and Fellows Nominations Committee, American Meteorological Society
- 2011 – 2016 Science Advisory Board, NOAA/NCAR Developmental Testbed Center (DTC)
- 2011 – 2014 Nominations Committee for President & Councillors, American Meteorological Society
- 2010–2014 Co-Chair, World Meteorological Organisation (WMO) 8th International Workshop on Tropical Cyclones (IWTC-VIII), Republic of Korea
- 2011–2015 Editorial Board, Dataset Papers in Science: Atmospheric Science
- 2013 Postdoctoral Fellowships Review Panel, NASA
- 2012–2013 Review Team, Hurricane Risk Modeling for the South Carolina Insurance Administration
- 2012 NASA Postdoctoral Fellowships Review Panel
- 2011–2012 Reviewer, US National Academy of Sciences Report “Weather Services for the Nation: Second to None”
- 2011 Review Team Consulting Meteorologist, Hurricane Risk Modeling for the Maryland Department of Insurance
- 2007–2009 Executive Committee, Board on Oceans and Atmosphere, Association of Public and Land-grant Universities (APLU)
- 2006–2009 US Science Steering Committee, The Observing System Research and Predictability Experiment (THORPEX)
- 2007–2008 Hurricane Risk Modeling Consulting Meteorologist for the Massachusetts Property Insurance Underwriting Association
- 2006–2008 US Science Steering Committee, THORPEX/ T-PARC (Pacific Asian Regional Campaign)
- 2008 Co-Chair, Agencia Estatal de Meteorología National Workshop on Subtropical Cyclones and Extratropical Transitions, Madrid, Spain

Prior External Professional Service (continued)

- 2008 Science Operations Team (mission coordination for T-PARC field experiment)
Extratropical Transition (ET), THORPEX/ T-PARC
- 2005–2008 Councilor (elected), American Meteorological Society (AMS)
- 2005–2007 Editor, Monthly Weather Review
- 2007 Council Facilitator, American Meteorological Society Statement “Hurricane Forecasting in the United States”
- 2006 Panelist, National Science Board Panel “Towards a national agenda for hurricane science and engineering”
- 2005 Program committee, 3rd WMO International Workshop on Extratropical Transition (IWET-III), Perth, Australia
- 2005 Panelist, National Research Council Panel “Weather for Earth Science and Applications from Space: A Community Assessment and Strategy for the Future”
- 2005 CAMEX Proposal Review Panel, NASA
- 2001–2005 Editorial Board, Bulletin of the American Meteorological Society
- 2000–2005 Science Steering Committee, United States Weather Research Program (USWRP)
- 2003–2004 Chair, AMS Nominations Committee for President and Councilors
- 2004 NOAA Hurricane Hunters flights into Hurricane Ivan, on the two days immediately prior to its landfall
- 2003 Professional Team Backup Meteorologist, Florida Commission on Hurricane Loss Projection Methodology
- 2001–2004 Associate Editor, Weather and Forecasting
- 2001–2003 AMS Nominations Committee for President and Councilors
- 2002 Co-convener, Hurricane Weather and Research Forecast (WRF) Modeling Workshop, National Science Foundation Headquarters, Arlington, Virginia
- 2001 NSF IGERT Proposal Review Panel
- 1999 Chair, AMS Conference on Tropical Meteorology and Tropical Cyclones, Dallas, TX.
- 1999 Session chair, 1999 Meteorological Satellite Users' Conference of EUMETSAT, Copenhagen, Denmark
- 1998-2000 Science Team, United States Army Tropical Test Facility Relocation Initiative
- 1997-2000 Chair, AMS Tropical Meteorology and Tropical Cyclones Committee
- 1996-2000 Member, AMS Tropical Meteorology and Tropical Cyclones Committee

Prior Service in Academic Planning and Governance

- 2017 – 2019 Director, Penn State’s Institute for CyberScience (ICS)
- 2017 – 2019 Penn State Working Group on Open Access to Research
- 2016 – 2019 Advisory Committee, Earth and Environmental Systems Institute (EESI)

Prior Service in Academic Planning and Governance (continued)

- 2008 – 2019 Steering Committee, Earth System Science Center (ESSC)
- 2017 Driving Digital Innovation Panel, Penn State Strategic Plan Implementation, Behrend campus
- 2014 – 2017 Advisory Committee, Department of Meteorology and Atmospheric Science
- 2016 – 2017 Ad Hoc Planning Committee for Climate Science dual title Ph.D. program, The Pennsylvania State University
- 2016 Interim Director, Penn State’s Institute for CyberScience (ICS)
- 2016 Liaison, Penn State – Australian and New Zealand University Partners
- 2016 Convener, NSF INFEWS proposal by the Climate Change and Impacts Downscaling (CCID) Science Team, Penn State, Lead Institution
- 2016 Search Committee, Penn State Vice President for IT/Chief Information Officer
- 2015 – 2016 Chair, Search Committee for the Inaugural Director of the Penn State Water Institute
- 2013–2016 Co-convenor, PSIEE/EESI Science Communications Workshops
- 2013–2016 Co-chair, Climate Change and Impacts Downscaling (CCID) Initiative of Penn State’s Institutes of Energy and the Environment (IEE) [PSIEE renamed]
- 1994–2015 Honors Student Advisor, Department of Meteorology
- 2015 Co-Chair, Task Force to Review the Penn State Sustainability Institute
- 2014–2015 Acting Director, Penn State Institutes of Energy and the Environment (PSIEE)
- 2014–2015 Working Group for Strategic Planning, Office of the VP for Research
- 2014–2015 Penn State Strategic Planning Working Group: Managing and Stewarding our Resources
- 2014–2015 Penn State University Research Council Advisory Group
- 2014–2015 Penn State University Health Sciences Council
- 2014 Panel Moderator, 2014 Graduates of Earth and Mineral Sciences (GEMS) Industry Forum, Natural Disasters: The Power of Nature and Its Challenge to Energy Security [panel included Dept. Of Energy Assistant Secretary Hoffman]
- 2014 Lead PI, NSF STC proposal by the Climate Change and Impacts Downscaling (CCID) Science Team, Penn State, Lead Institution
- 2013 Interim Director, Earth and Environmental Systems Institute (EESI)
- 2013 Organizing Committee, Science Communications Initiative, PSIEE/EESI
- 2012–2013 Chair, Spreading the Word About EMS (SWAE) Committee, College of Earth and Mineral Sciences
- 2012 Red Team reviewer, SCRiM [Network for Sustainable Climate Risk Management] proposal to NSF SRN (awarded)
- 2011–2014 Chair, Promotion and Tenure Committee, Department of Meteorology
- 2010–2012 Chair, Graduate Academic Program Committee, Department of Meteorology

Prior Service in Academic Planning and Governance (continued)

1994–2011 Advisory Board, Women in Science and Engineering (WISE) Institute, The Pennsylvania State University

2007–2011 Advisory Committee, Center for Energy and Environmental Risk (CEER)

2010 Ad Hoc Committee on Workshops, Earth and Environment Systems Institute

2009–2010 Department of Energy and Mineral Engineering Faculty Search Committee, Quantitative Analysis of Energy Risk

2009–2010 Promotion and Tenure Committee, Department of Meteorology

1999–2009 Chair, Opportunities Committee, Department of Meteorology

2009 Distinguished Professor Nomination Committee, College of Earth & Mineral Sciences

2009 Environment Fellows Selection Committee, Earth & Environmental Systems Institute

2009 Department of Statistics External Review

2008–2009 Ph.D. Candidacy Exam Framework Review, Department of Meteorology

2008–2009 Faculty Search Committee, Quantitative Analysis of Energy Risk, Department of Energy and Mineral Engineering

2008 Associate Department Head Search Committee, Department of Meteorology

2007–2009 Advisory Committee, Earth and Environmental Systems Institute

2007–2008 Strategic Planning Committee, Earth and Environmental Systems Institute

2006–2007 Chair, Search Committee for the Director, The Pennsylvania State University Women in Science and Engineering (WISE) Institute

2004 General Education Committee, Department of Meteorology

2001–2004 Strategic Planning Committee, Department of Meteorology

2003–2004 Faculty Search Committee, Department of Meteorology

2003 Faculty Search Committee, Department of Meteorology

2002–2003 Search Committee for the Environment Institute (now EESI) Director, College of Earth and Mineral Sciences

2001–2002 Diversity Committee, College of Earth and Mineral Sciences

2000 Search Committee for the Diversity Officer, College of Earth and Mineral Sciences

1999 Search Committee for the Associate Director, Penn State WISE Institute

1997–1998 Committee Reviewing the Dean’s Office, College of Earth and Mineral Sciences

1995–1997 Faculty Adviser, Penn State Branch of the Association for Women in Science [AWIS]

1995–1996 Climate and Hydrology Theme Group Leader, Earth System Science Center

1994–1996 Undergraduate Academic Program Committee, Department of Meteorology

1994 Faculty Search Committee, Department of Meteorology

Prior Service in Academic Planning and Governance (continued)

1993–1995 Scholarships Committee, College of Earth and Mineral Sciences

1993–1994 Computer Committee, Earth System Science Center

DIVERSITY

Improving the diversity of our professional science community (within and external to Penn State) has been one of my goals since arriving at Penn State.

I was the only member of the Advisory Board of the Penn State Women in Science & Engineering (WISE) Institute to serve from its inception in 1994 to its demise in 2011.

Undergraduate, Graduate & Faculty Initiatives – recruitment, skills building, retention

- Keynote speaker Graduate Women In Science (GWIS) National Conference
- Speaker, WISE Institute Voices Conference
- Organizing committee and session chair, WISE Challenges and Achievements Conference
- Organizing committee, WISE Challenges and Achievements Conference
- Panel chair, WISE Challenges and Achievements Conference

Initiatives Focused on High school students – science discovery

- Nittany Science Camp for 6–8 Grade girls
- Expanding Your Horizons workshops for 7–9 Grade girls
- Math Options workshops for Grade 7 girls

PEDAGOGICAL CONTRIBUTIONS

Graduate Program

Graduate courses: Geophysical Fluid Dynamics (Meteo 520, required core course), Climate Modeling (Meteo 523), Advanced Tropical Meteorology (Meteo 525), Numerical Weather Prediction (Meteo 526), Tropical Meteorology (Meteo 597A), Tropical Climate (Meteo 597B)

Graduate seminars: 1) tropical cyclone motion; 2) tropical storm intensification; 3) tropical cyclogenesis; 4) tropical variability; 5) tropical climate change; 6) tropical cyclone sensitivity to climate change; 7) extratropical transition of tropical cyclones and research methods.

Undergraduate Program

Undergraduate courses: Freshman Seminar (EM SC 100S), Introductory Dynamics (Meteo 421), Advanced Dynamics (Meteo 422), Tropical Meteorology (Meteo 452)

Undergraduate Research Projects Supervised

I have supervised 26 undergraduate Honors theses, independent study, NSF REU, NSF Minority Undergraduate Research Experience (MURE), NASA WISER research projects.

Cole Evans (2017)

REU Paper: A universal mixture model formulation for clustering ensemble forecasts of TC track & structure

NSF Research Experience for Undergraduates

Cole presented this work at the AMS Annual Meeting in 2018.

Daneisha Blair (2016)

Sensitivity of tropical cyclone intensity to ocean fluxes and atmospheric stability

NSF Research Experience for Undergraduates

Daneisha presented this work at the AMS Annual Meeting in 2017.

Todd Emmenegger (2016)

Statistical methods for synthesis of ensembles of numerical hurricane forecasts in the service of operational hurricane forecasting

NSF Research Experience for Undergraduates

Todd presented his research at the AMS Annual Meeting in 2016.

Kelly Núñez Ocasio (2015)

Role of topography in the development of mesoscale convective systems in tropical West Africa

NSF Research Experience for Undergraduates

Kelly presented her research at the AMS Annual Meeting in 2016. She began her Doctoral research with me in Penn State's Meteorology program in August 2016.

Undergraduate Research Projects Supervised (continued)

Glorianne Rivera (2014)

Contrasting a non-developing African mesoscale convective system with the precursor to Hurricane Helene (2006)

NSF Research Experience for Undergraduates

Glorianne presented this work at the AMS Annual Meeting in 2015 and 2015 AGU Fall Meeting. Glorianne went on graduate school at the University of Miami.

Konstantine (Dean) Pryles (2013)

Role of coastal topography in pre-tropical cyclone disturbance formation

NSF Research Experience for Undergraduates

Dean presented our work on this NSF-funded research project at two national conferences in 2014.

Alicia Klees (2011 – 2012)

Importance of resolved scales in simulating tropical cyclogenesis

Undergraduate honors thesis.

Alicia's work on this NSF-funded research project required her to develop strong numerical modeling and data analysis skills. Alicia began her graduate studies in 2012.

Andrew Dzambo (2011 – 2013)

Hurricane Sandy forecast evaluation

Two undergraduate writing projects (Fall 2011 and Spring 2012) and independent study projects (Fall 2012 and Spring 2013).

Jennifer Van Der Horn (2011)

Impact of tropical cyclones on oil rigs in the Gulf of Mexico

Undergraduate independent study project (Fall 2011 and Spring 2012).

Casey Webster (2010 – 2011)

Compositing of ensemble partitions through path clustering

NSF Research Experience for Undergraduates (REU) (EMS College Marshall)

Observed relationships between tropical convection and sea surface temperatures

Undergraduate independent study research paper

Casey was the EMS College Marshall, the top student, in his in graduating class. This research resulted in the journal article, Evans and Webster (2014).

Allyson Clark (2009 – 2010)

Evacuation metrics of hurricane forecast accuracy for the 2004 and 2005 hurricane seasons

Honors thesis

Allyson went on graduate school at Colorado State in 2010.

Undergraduate Research Projects Supervised (continued)

Nikki Kinney (2009)

Metrics for evaluating numerical model physics configurations

NSF Research Experience for Undergraduates (REU)

In 2010, Nikki went on to pursue graduate studies at Texas A&M University.

Undergraduate Research Projects Supervised (continued)

Adam Arnold (2006 – 2008)

Using evacuation metrics as a measure of hurricane forecast accuracy

Funded research project (pre-graduate school)

Vorticity and landfalling hurricanes: A case study of Hurricane Ivan

Undergraduate independent study research paper

Alex Gonzales (2006 – 2008)

Hurricane forecasting in 19th and early 20th century USA and Cuba

MURE Freshman research project and NSF REU.

Alex translated some early writings of pioneering hurricane forecaster, Padre Benito Viñes, and related the theory to his classes. He earned a Ph.D. in Atmospheric Sciences at Colorado State.

Kevin Grise (2004 – 2005)

Multi-sensor exploration of cloud and rain signatures for two landfalling tropical cyclones

Department of Meteorology Honors Thesis (EMS College Marshall)

Cho Hin (Richard) Lam (2004 – 2006)

Evaluation of NHC forecasts for Hurricane Katrina (2005)

Undergraduate independent study research paper.

Effectiveness of the cyclone phase space in tracking structure evolution

Minority Undergraduate Research Experience Freshman research project.

Julie Malingowski (2004 – 2005)

In the life of a storm: Hurricane Charley and Hurricane Frances

Undergraduate independent study research paper.

Julie completed a Masters degree at the University of Alaska.

Christie Schultz (2003 – 2004)

Significant weather associated with tropical cyclone passage in New England

NASA Women in Science and Engineering Research (WISER) Freshman Project.

Sandra M McKinnon (2000 – 2003)

Tropical cyclone intensity measurement sensitivity to observing platform

NASA Women in Science and Engineering Research (WISER) Freshman Project.

Undergraduate Research Projects Supervised (continued)

Adam Lopes (2001 – 2002)

Contrasting the environments of extratropically transitioning tropical cyclones and midlatitude bombs

Department of Meteorology Honors Thesis.

Michael Pontrelli (1999)

Tropical tropopause response to the passage of a tropical cyclones

Undergraduate independent study

Gayathri Vijumakura (1998 – 1999)

The Navy Automated Tropical Cyclone Forecast System

NASA Women in Science and Engineering Research (WISER) Freshman Project

Gayathri developed an early website for the US Navy ATCF (Automated TC Forecasting) system. Her website formed the basis of the Navy's ATCF documentation.

Tommy Owens (1997 – 1998)

An index for tropical cyclogenesis

Undergraduate independent study

Tommy was a commercial fisherman who came to undergraduate studies later in life.

Jayma Hamilton (1997 – 1998)

Instrumentation in the GARP Atlantic Tropical Experiment [GATE 1975] field programme

NASA Women in Science and Engineering Research (WISER) Freshman Project

AMS History of Meteorology website; AMS 25th GATE Anniversary Workshop (1999).

Anneliese Sherer (1997 – 1998)

Scientists participating in the GATE field programme

NASA Women in Science and Engineering Research (WISER) Freshman Project

AMS History of Meteorology website; AMS 25th GATE Anniversary Workshop (1999).

Kathleen McKinley (1996 – 1998)

Timing of tropical cyclone peak intensity and storm recurvature

NASA Women in Science and Engineering Research (WISER) Freshman Project

This research resulted in the journal article Evans and McKinley (1998).

SELECTED CONFERENCE PAPERS

Student co-authors: graduate students and postdocs for whom I was major advisor for the published research; *all other students* (graduate committees or undergraduate advisees).

1. Nuñez Ocasio, Kelly M., **Jenni L. Evans**, and G. S. Young, 2020: Favorable synoptic scale environment over Eastern Africa for prediction of tropical cyclogenesis. *100th AMS Annual Meeting*, 12-16 January 2020, Boston MA.
2. Polasky, Andrew, **Jenni L. Evans**, and Jose Fuentes, 2020: Downscaling climate model data for energy and crop modeling using self-organizing maps. *100th AMS Annual Meeting*, 12-16 January 2020, Boston MA.
3. Kowaleski, Alex, and **Jenni L. Evans**, 2020: Use of mixture model clustering to inform tropical cyclone track forecasts. *100th AMS Annual Meeting*, 12-16 January 2020, Boston MA.
